SMALL DESK CONSOLES

BIM2800 RANGE

Available in three sizes and incorporating either one or two satin finished, 2mm thick, aluminium panels for mounting displays, indicators and keyboards etc, the BIM 2800 range of small desk consoles comprises a two-part moulding, the light grey base section having push-fit rubber feet and moulded in board or sub-assembly mounting bosses, and the light grey upper section allowing the display panel (or panels) to sit recessed.

With both the upper and lower sections being moulded in ABS, these consoles can be readily drilled or punched, have excellent electrical insulation properties and will withstand continuous heat of up to 85°C (185°F).
