

Safe Condition Signs

For price
information, refer to the
enclosed pricelist

The following range of signs convey information about safe conditions and first aid. Signs must be displayed to show escape routes, first aid facilities and safe areas.

The shape of the sign must be **rectangular or square** and the background colour must be **green**. White is used as a contrasting colour for the symbols and/or text.

The symbols that need to be used are shown in the Health and Safety Regulations. The inclusion of safety text, sometimes obligatory, is used to clarify the meaning of a sign.

Photoluminescent signs

Accidents, fires, disasters: we hope you and your company will never have to deal with them but you do need to be prepared for everything. One of the first things affected in the case of fire or other disasters is the lighting. To meet the regulations, escape routes must be marked with signs that can be seen in such conditions, by using emergency power supplies and photoluminescent signs. Further information on these signs can be found on pages 14, 15 and 20.
