Description

3dB quadrature mini-hybrids are the ultimate in compact, rugged high stress environment components. The crossover feature of the location of both outputs on one side allows simplicity in system or subsystem design. Multi-octave coverage of the complete frequency spectrum, along with high isolation performance, qualifies them as an asset to any system.

All dimensions are $\pm .020$ except mounting diameters ($\pm .005$) and mounting hole location ($\pm .010$).

Description

These 3dB coaxial hybrids are ultra-compact. A signal applied into any terminal appears at both outputs with one-half the amplitude and shifted 90 degrees out of phase.

The units mount four SMA jack, low VSWR connectors. These couplers may be used in mixers, duplexers and other applications requiring equal power division.

All dimensions are $\pm .020$ except mounting diameters ($\pm .005$) and mounting hole location ($\pm .010$).

Description

These 3dB 180° mini-hybrids are highly reliable rugged stripline-constructed units that can be used either to divide or combine R.F. power. A signal incident at the sum (Σ) port will yield in-phase amplitude balanced signals at the output ports. Conversely, a signal applied to the difference (Δ) port will yield amplitude balanced and 180° out of phase signals at the output ports.

All dimensions are $\pm .020$ except mounting diameters ($\pm .005$) and mounting hole location ($\pm .010$).
