

Dear Mr Wilson, 474-320

Please find detailed below the information you require.

12060 = 230v/12v 50/60Hz 60VA Transformer

Remove lid.

Push light tails into left hand side and connect to connector block.

Push mains cable into right hand side and connect as per label.

Use screws supplied to attach to bench if required.

Tighten cable restraint and replace lid before use.

Please contact me if you require any further information.

Kind regards,

Helen Fearnley
