Industry Standard Tools

**Pro-Tool™
Kits**

From Harris, the industry standard in tools and test sets, this newest tool kit package is designed to meet the needs of professional technicians who are expanding into telecommunications and data communications. Harris Pro-Tool Kits feature the most popular and essential wiring tools. Available in three convenient styles, each kit includes a durable Anso-Tex® nylon pouch. Featured are four of the most frequently required tools—the D914™ Impact Tool, Can Wrench, Cable Splicing Knife and Electrician's Snips.

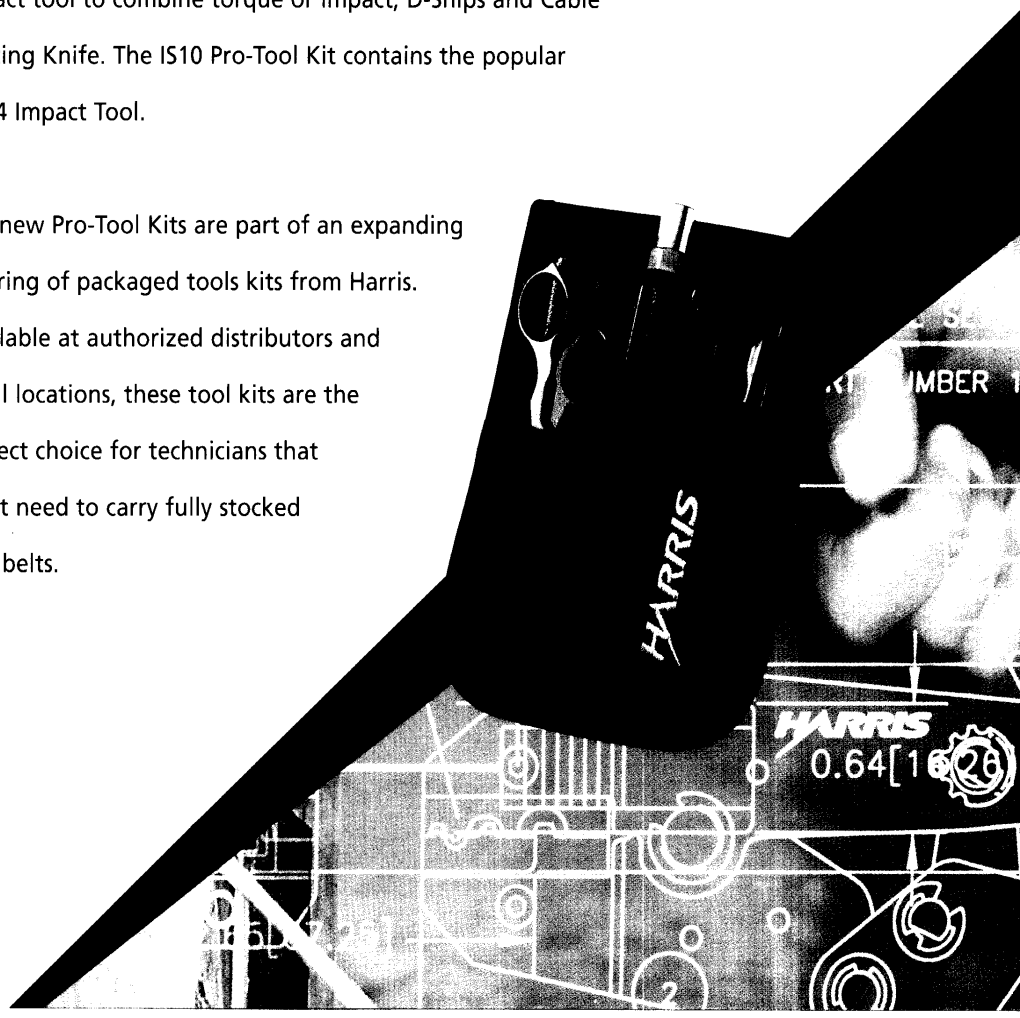

Pro-Tool Kits, complete with pouch, are available in three options. The IS30 Pro-Tool Kit features all four tools. The IS20 Pro-Tool Kit includes the D914 Impact Tool, the only impact tool to combine torque or impact, D-Snips and Cable Splicing Knife. The IS10 Pro-Tool Kit contains the popular D914 Impact Tool.

The new Pro-Tool Kits are part of an expanding offering of packaged tools kits from Harris. Available at authorized distributors and retail locations, these tool kits are the perfect choice for technicians that don't need to carry fully stocked tool belts.

New

next level solutions

IS30 Pro-Tool Kit
Features Include

- **D914 Impact Tool**, combines impact and torque with a hook for isolating wires and a multi-purpose Spudger
- **Cable Splicing Knife** features a short 1.75" blade for strength and a cutlery-steel blade for long-lasting durability
- **D-Snips**, features a unique ergonomically-designed handle that provides 1-1/2 times the cutting force with half the effort and minimizes hand fatigue.
- **Can Wrench**, with color-coded socket ends and built-in ribs on the barrel for user comfort, safety and greater torque power
- **Nylon Pouch**, in durable Anso-Tex
