12-Channel 1:2 MUX/DEMUX Switch with Integrated 4-Channel Sideband Signal Switching for DVI/HDMI and DisplayPort (DP) Applications

Check for Samples: TS3DV621

FEATURES

- **Switch Type: 2:1 or 1:2**
- **Data Rate Compatibility**
  - **HDMI v1.4**
  - **DVI 1.0**
  - **DisplayPort 1.1a**
- **Bandwidth (-3dB) – 2.2 GHz**
- **R_{ON} – 8 Ω**
- **C_{ON} – 5.6 pF**
- **V_{CC} Range – 3.0V–3.6 V**
- **I/O Voltage Range – 0–5 V**
- **Bit-to-Bit Skew – 6 ps Typical**
- **Propagation Delay – 40 ps Typical**
- **Special Features**
  - **Dedicated Enable Logic Supports Hi-Z Mode**
  - **I_{OFF} Protection Prevents Current Leakage in Powered Down State (V_{CC} = 0 V)**
- **ESD Performance**
  - **2kV Human Body Model (A114B, Class II)**
  - **1kV Charged Device Model (C101)**
- **42-pin QFN Package (9 x 3.5 mm, 0.5 mm Pitch)**

APPLICATIONS

- **DVI/HDMI/DisplayPort Signal Switching**
- **General Purpose TMDS Signal Switching**

DESCRIPTION

The TS3DV621 is a 1:2 or 2:1 bi-directional multiplexer/demultiplexer with a integrated 4 side-band control channel (DDC, AUX, CEC, or HPD) signal switcher. Operating from a 3 to 3.6V supply, the TS3DV621 offers low and flat ON-state resistance as well as low I/O capacitance, which allows the TS3DV621 to achieve a typical bandwidth of 2.2 GHz. The device provides the high bandwidth necessary for HDMI, DVI, and DisplayPort applications. The TS3DV621 expands the high-speed physical link interface from a single HDMI port to two HDMI ports (A or B port) or vise-versa. It can also be used for DisplayPort (DP) source/sink applications. The integrated side-band control channels allow 5V signals to pass through, making the TS3DV621 suitable for HDMI applications.

The most common application for the TS3DV621 is the sink application. In this case, there are two possible sources (DVD, set-top box, or game console) that are routed to one receiver. The unselected port is in the high-impedance mode, such that the receiver receives information from only one source. HDCP encryption is passed through the switch for the receiver to decode.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of the Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

Copyright © 2012, Texas Instruments Incorporated

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

ABSOLUTE MAXIMUM RATINGS(1)

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
V_{CC}	Supply voltage range		-0.5	4.6	V
$V_{I/O}$	Analog voltage range(2)(3)(4)	All I/O	–0.5	7	V
V_{IN}	Digital input voltage range(2)(3)	SEL1, SEL2	–0.5	7	V
$I_{I/OK}$	Analog port diode current	$V_{I/O} < 0$		–50	mA
I_{IK}	Digital input clamp current	$V_{IN} < 0$		–50	mA
$I_{I/O}$	On-state switch current(5)	All I/O	–128	128	mA
I_{DD} I_{GND}	Continuous current through V_{DD} or GND		–100	100	mA
θ_{JA}	Package thermal impedance(6)	RUA package		31.8	°C/W
T_{stg}	Storage temperature range		–65	150	°C

(1) Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) All voltages are with respect to ground, unless otherwise specified.
(3) The input and output voltage ratings may be exceeded if the input and output clamp-current ratings are observed.
(4) V_I and V_O are used to denote specific conditions for $V_{I/O}$.
(5) I_I and I_O are used to denote specific conditions for $I_{I/O}$.
(6) The package thermal impedance is calculated in accordance with JESD 51-7

RECOMMENDED OPERATING CONDITIONS(1)

			MIN	MAX	UNIT
V_{CC}	Supply voltage		3	3.6	V
V_{IH}	High-level control input voltage	SEL1, SEL2	2	5.5	V
V_{IL}	Low-level control input voltage	SEL1, SEL2	0	0.8	V
V_{IN}	Input voltage	SEL1, SEL2	0	5.5	V
$V_{I/O}$	Input/Output voltage		0	5.5	V
T_A	Operating free-air temperature		–40	85	°C

(1) All unused control inputs of the device must be held at VDD or GND to ensure proper device operation. Refer to the TI application report, *Implications of Slow or Floating CMOS Inputs*, literature number SCBA004.

ELECTRICAL CHARACTERISTICS

PARAMETER			TEST CONDITIONS(1)	MIN	TYP(2)	MAX	UNIT
V_{IK}	Digital input clamp voltage	SEL1,SEL2	V_{CC} = 3.6 V, I_{IN} = -18 mA	– 1. 2	– 0. 8		V
R_{ON}	On-state resistance	All I/O	V_{CC} = 3 V, 1.5 V ≤ $V_{I/O}$ ≤ V_{CC}, $I_{I/O}$ = –40 mA		8	12	Ω
$R_{ON(flat)}$ (3)	On-state resistance flatness	All I/O	V_{CC} = 3 V, VI/O = 1.5 V and V_{CC}, $I_{I/O}$ = –40mA		1.5		Ω
ΔR_{ON} (4)	On-state resistance match between channels	All I/O	V_{CC} = 3 V, 1.5 V ≤ $V_{I/O}$ ≤ V_{CC}, $I_{I/O}$ = –40mA		0.4	1	Ω
I_{IH}	Digital input high leakage current	SEL1,SEL2	V_{CC} = 3.6 V , V_{IN} = V_{DD}			±1	µA
I_{IL}	Digital input low leakage current	SEL1,SEL2	V_{CC} = 3.6 V, V_{IN} = GND			±1	µA
I_{OFF}	Leakage under power off conditions	All outputs	V_{CC} = 0 V, $V_{I/O}$ = 0 to 3.6 V, V_{IN} = 0 to 5.5V			±1	µA
C_{IN}	Digital input capacitance	SEL1,SEL2	f = 1 MHz, V_{IN} = 0 V		2.6	3.2	pF
C_{OFF}	Switch OFF capacitance	All I/O	f = 1 MHz, $V_{I/O}$ = 0 V, Output is open, Switch is OFF		2		pF
C_{ON}	Switch ON capacitance	All I/O	f = 1 MHz, $V_{I/O}$ = 0 V, Output is open, Switch is ON		5.6		pF
I_{CC}	VCC supply current		V_{CC} = 3.6 V, $I_{I/O}$ = 0, V_{IN} = V_{DD} or GND		300	400	µA

(1) V_I, V_O, I_I, and I_O refer to I/O pins, V_{IN} refers to the control inputs
(2) All typical values are at V_{CC} = 3.3V (unless otherwise noted), T_A = 25°C
(3) $R_{ON(FLAT)}$ is the difference of R_{ON} in a given channel at specified voltages.
(4) ΔR_{ON} is the difference of R_{ON} from center port to any other ports.

SWITCHING CHARACTERISTICS

Over recommended operation free-air temperature range, V_{CC} = 3.3 V ± 0.3 V, R_L = 200 Ω, C_L = 4 pF (unless otherwise noted) (see and)

PARAMETER	FROM (INPUT)	TO (OUTPUT)	MIN	TYP(1)	MAX	UNIT
t_{pd} (2)	All I/O input side	All I/O output side		40		ps
t_{PZH}, t_{PZL}	SEL1, SEL2	All I/O	2		7	ns
t_{PHZ}, t_{PLZ}	SEL1, SEL2	All I/O	2		5	ns
$t_{sk(o)}$ (3)	All I/O input side	All I/O output side		6	30	ps
$t_{sk(p)}$ (4)				6	30	ps

(1) All typical values are at V_{CC} = 3.3 V (unless otherwise noted), T_A = 25°C.
(2) The propagation delay is the calculated RC time constant of the typical ON-State resistance of the switch and the specified load capacitance when driven by an ideal voltage source (zero output impedance).
(3) Output skew between center port and any other channel.
(4) Skew between opposite transitions of the same output $|t_{PHL} – t_{PLH}|$

DYNAMIC CHARACTERISTICS

Over recommended operation free-air temperature range, V_{CC} = 3.3 V ± 0.3 V (unless otherwise noted)

PARAMETER	TEST CONDITIONS	TYP(1)	UNIT
XTALK	R_L = 50 Ω, f = 250 MHz (Figure 11)	–43	dB
OIRR	R_L = 50 Ω, f = 250 MHz (Figure 12)	–42	dB
BW	R_L = 50 Ω, Switch ON (Figure 10)	2.2	GHz

(1) All typical values are at V_{CC} = 3.3 V (unless otherwise noted), T_A = 25°C.

REVISION HISTORY

Changes from Original (January 2012) to Revision A **Page**

- Changed C_{ON} value in FEATURES from 5.6 pF to 4 pF. 1
- Deleted LEVEL-SHIFTING REQUIREMENT FOR DUAL-MODE DP/HDMI APPLICATION section from document. 4
- Added C_{ON} TYP value to the ELECTRICAL CHARACTERISTICS table. 6

Changes from Revision A (February 2012) to Revision B **Page**

- Changed C_{ON} value from 4 pF to 5.6 pF. 1
- Changed C_{ON} TYP value to the ELECTRICAL CHARACTERISTICS table. 6

Copyright © 2012, Texas Instruments Incorporated

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/ Ball Finish	MSL Peak Temp (3)	Samples (Requires Login)
TS3DV621RUAR	ACTIVE	WQFN	RUA	42	3000	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

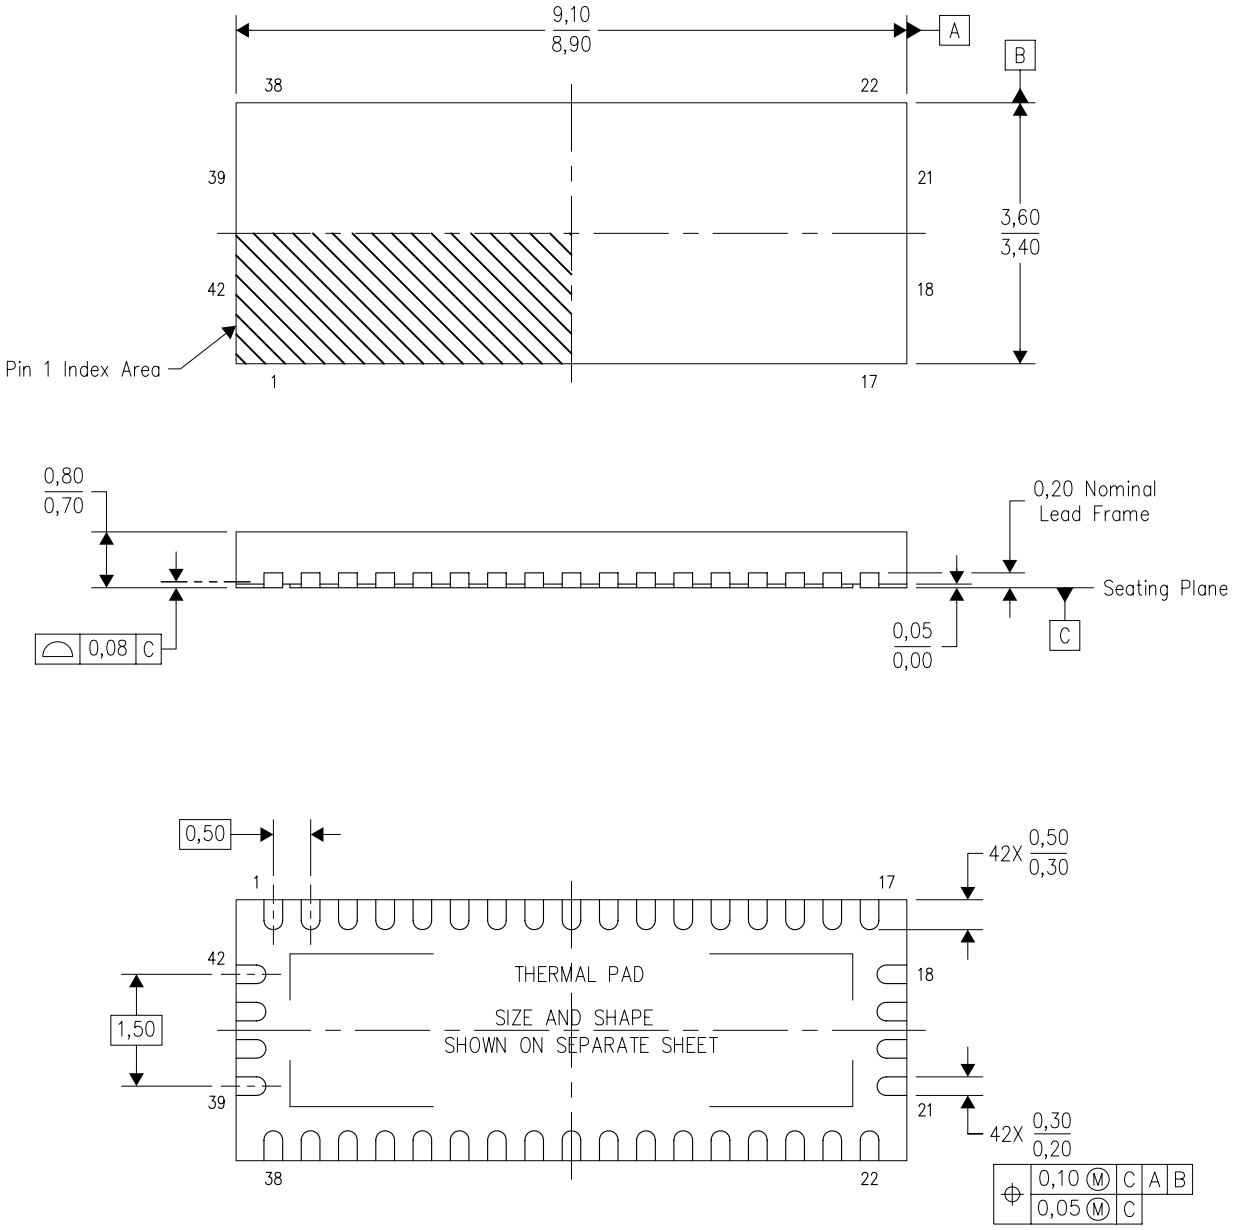
(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

RUA (R–PWQFN–N42) PLASTIC QUAD FLATPACK NO–LEAD



NOTES:
A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M–1994.
B. This drawing is subject to change without notice.
C. QFN (Quad Flatpack No–Lead) package configuration.
D. The package thermal pad must be soldered to the board for thermal and mechanical performance.
E. See the additional figure in the Product Data Sheet for details regarding the exposed thermal pad features and dimensions.

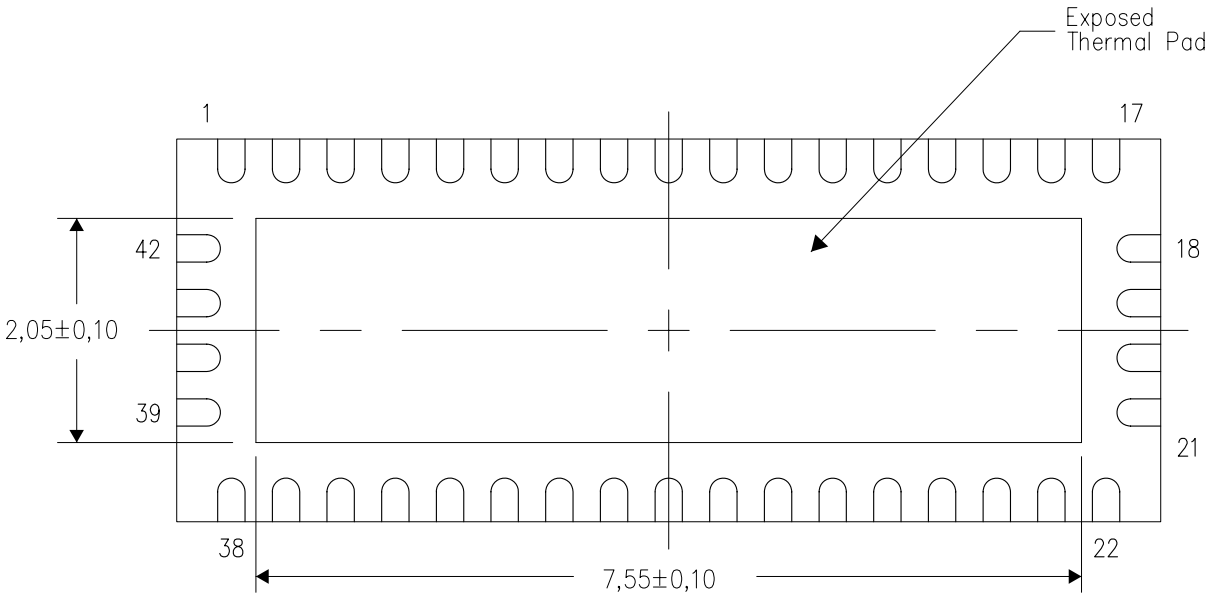
RUA (R–PWQFN–N42) PLASTIC QUAD FLATPACK NO–LEAD

THERMAL INFORMATION

This package incorporates an exposed thermal pad that is designed to be attached directly to an external heatsink. The thermal pad must be soldered directly to the printed circuit board (PCB). After soldering, the PCB can be used as a heatsink. In addition, through the use of thermal vias, the thermal pad can be attached directly to the appropriate copper plane shown in the electrical schematic for the device, or alternatively, can be attached to a special heatsink structure designed into the PCB. This design optimizes the heat transfer from the integrated circuit (IC).

For information on the Quad Flatpack No–Lead (QFN) package and its advantages, refer to Application Report, QFN/SON PCB Attachment, Texas Instruments Literature No. SLUA271. This document is available at www.ti.com.

The exposed thermal pad dimensions for this package are shown in the following illustration.



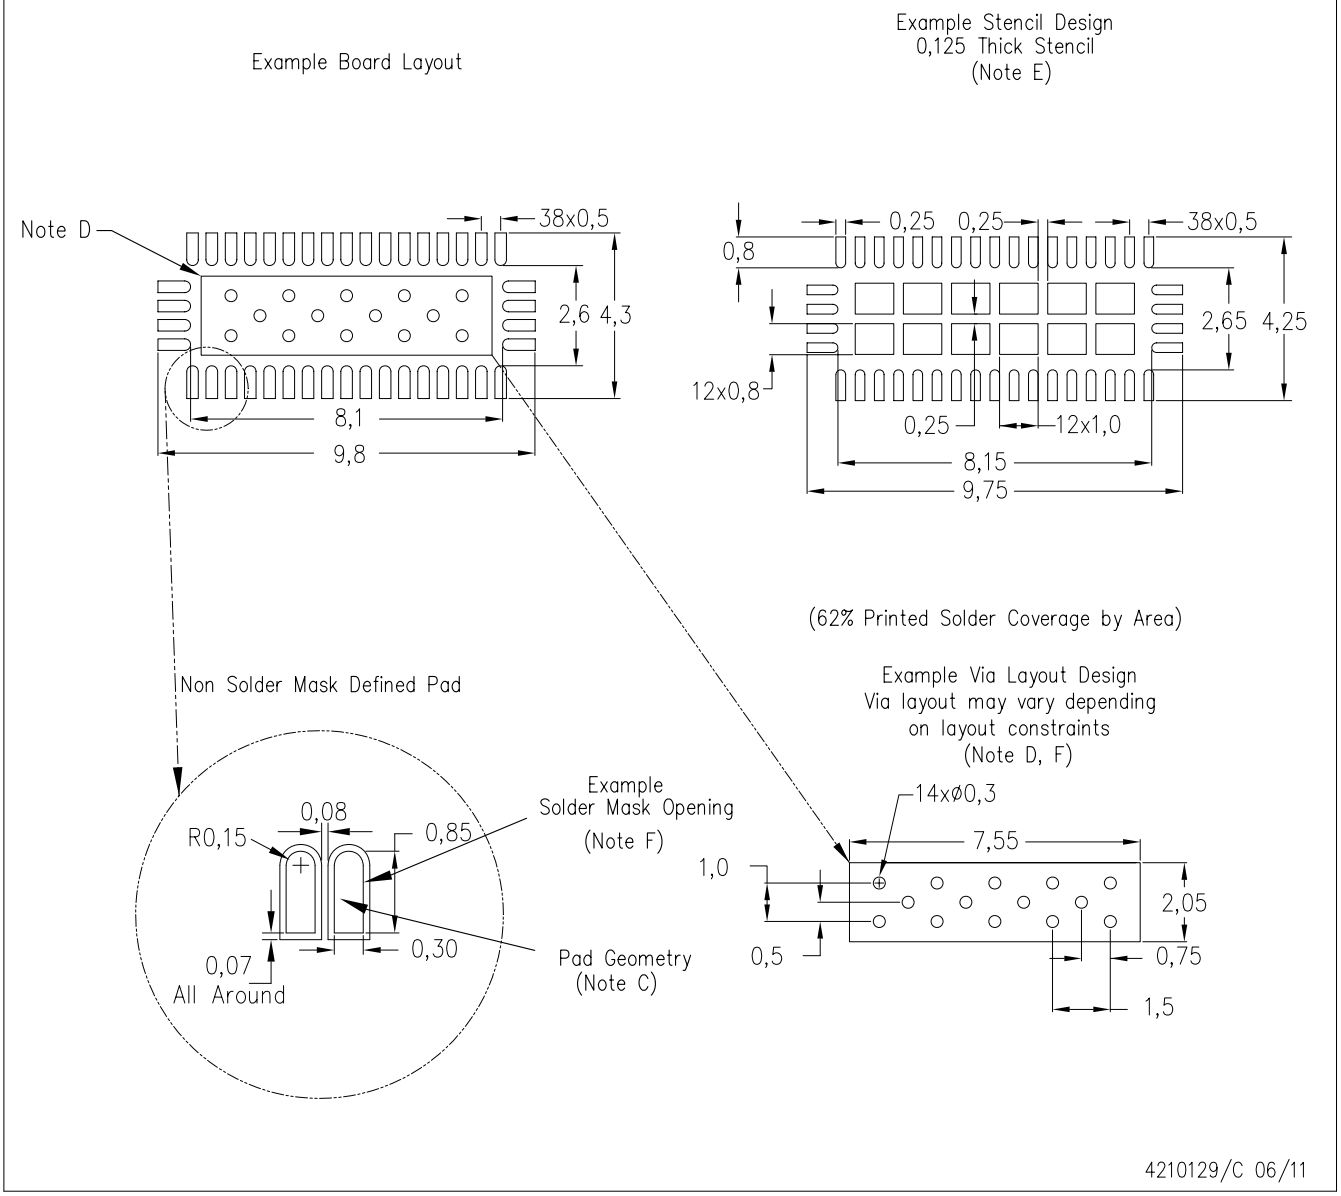
Bottom View

Exposed Thermal Pad Dimensions

4208352/D 06/11

NOTE: All linear dimensions are in millimeters

RUA (R–PWQFN–N42) PLASTIC QUAD FLATPACK NO–LEAD



NOTES:
A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Publication IPC–7351 is recommended for alternate designs.
D. This package is designed to be soldered to a thermal pad on the board. Refer to Application Note, Quad Flat–Pack Packages, Texas Instruments Literature No. SLUA271, and also the Product Data Sheets for specific thermal information, via requirements, and recommended board layout. These documents are available at www.ti.com <http://www.ti.com>.
E. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC 7525 for stencil design considerations.
F. Customers should contact their board fabrication site for recommended solder mask tolerances and via tenting recommendations for vias placed in the thermal pad.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
