NOTES:

- (1) TOLERANCE AND VOLTAGE DESIGNATION — The JEDEC type numbers shown indicate a tolerance of  $\pm 10\%$  with guaranteed limits on only  $V_Z$ ,  $I_R$ ,  $i$ , and  $V_F$  as shown in the electrical characteristics table. Units with guaranteed limits on all seven parameters are indicated by suffix "A" for  $\pm 10\%$  tolerance and suffix "B" for  $\pm 5\%$ , C for  $\pm 2\%$  and D for  $\pm 1\%$ .
- (2) ZENER VOLTAGE ( $V_Z$ ) AND IMPEDANCE ( $Z_{ZT}$  &  $Z_{ZK}$ ) — Test conditions for Zener voltage and impedance are as follows:  $I_Z$  is applied  $40 \pm 10$  ms prior to reading. Mounting contacts are located  $3/8$  to  $1/2$ " from the inside edge of mounting clips to the body of the diode. ( $T_A = 25^\circ\text{C} \pm 8^\circ\text{C}$ ).
- (3) SURGE CURRENT ( $i$ ) — Surge current is specified as the maximum allowable peak, non-recurrent square-wave current with a pulse width,  $PW$ , of 8.3 ms. The data given in Figure 6 may be used to find the maximum surge current for a square wave of any pulse width between 1 ms and 1000 ms by plotting the

applicable points on logarithmic paper. Examples of this, using the 3.3 V and 200 V zeners, are shown in Figure 7. Mounting contact located as specified in Note 3. ( $T_A = 26^\circ\text{C} \pm 2^\circ\text{C}$ ).

- (4) VOLTAGE REGULATION ( $\Delta V_Z$ ) — Test conditions for voltage regulation are as follows:  $V_Z$  measurements are made at 10% and then at 50% of the  $I_Z$  max value listed in the electrical characteristic table. The test currents are the same for the 5% and 10% tolerance devices. The test current time duration for each  $V_Z$  measurement is  $40 \pm 10$  ms. ( $T_A = 25^\circ\text{C} \pm 2^\circ\text{C}$ ). Mounting contact located as specified in Note 2.
- (5) MAXIMUM REGULATOR CURRENT ( $I_{ZM}$ ) — The maximum current shown is based on the maximum voltage of a 5% type unit, therefore, it applies only to the B-suffix device. The actual  $I_{ZM}$  for any device may not exceed the value of 5 watts divided by the actual  $V_Z$  of the device.  $T_L = 75^\circ\text{C}$  at  $3/8$ " maximum from the device body.
