General Description

The HMC175MS8 is a miniature double-balanced mixer in an 8-lead plastic surface mount Mini Small Outline Package (MSOP). The device can be used as an upconverter or downconverter. The mixer provides exceptional isolation and Intermodulation performance for applications in high signal density environments. This device can also be used as a biphaser modulator or demodulator. The MSOP8 is the smallest footprint available for a complete double-balanced mixer (0.118" x 0.190" x 0.040").

Item	Description
J1 - J3	PC Mount SMA RF Connector
U1	HMC175MS8 Mixer
PCB*	101650 Evaluation Board
* Circuit Board Material: Rogers 4350	

The circuit board used in the final application should use RF circuit design techniques. Signal lines should have 50 ohm impedance while the package ground leads and exposed paddle should be connected directly to the ground plane similar to that shown. A sufficient number of VIA holes should be used to connect the top and bottom ground planes. The evaluation circuit board shown is available from Hittite upon request.
