## DEFINITIONS

| Data sheet status |  |
| :--- | :--- |
| Objective specification | This data sheet contains target or goal specifications for product development. |
| Preliminary specification | This data sheet contains preliminary data; supplementary data may be published later. |
| Product specification | This data sheet contains final product specifications. |
| Limiting values | Limiting values are given in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one <br> or more of the limiting values may cause permanent damage to the device. These are stress ratings only and <br> operation of the device at these or at any other conditions above those given in the Characteristics sections of <br> this specification is not implied. Exposure to limiting values for extended periods may affect device reliability. |
