

TRANSIL™ ARRAY
FOR DATALINE PROTECTION**MAIN APPLICATIONS**

Data transmission lines protection, such as :

- Unipolar signal up to 5.5 V
- Bipolar signal in the ± 2.5 V range

FEATURES

- High surge capability Transil array:
 $I_{PP} = 40$ A (8/20 μ s)
- Peak pulse power : 300 W (8/20 μ s)
- Up to 6 bidirectional Transil functions
- Low clamping factor (V_{CL} / V_{BR}) at high current level
- Low leakage current
- ESD protection up to 15kV

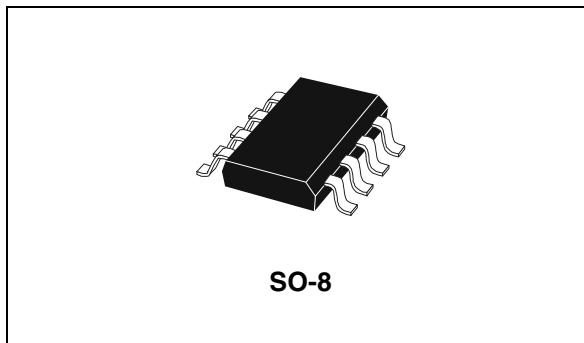

DESCRIPTION

Transil diode arrays provide high overvoltage protection by clamping action. Their instantaneous response to transient overvoltages makes them particularly suited to protect voltage sensitive devices such as MOS Technology and low voltage supplied IC's.

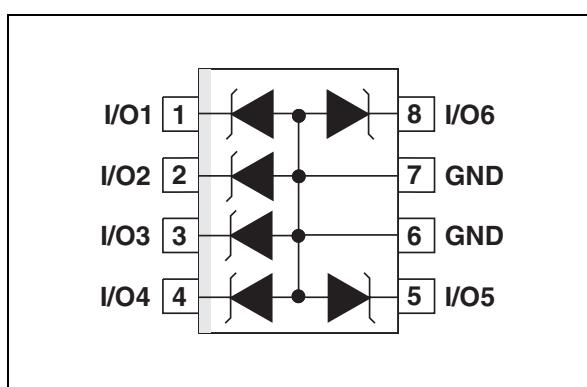

The ITA series allies high surge capability against energetic pulses with high voltage performance against ESD.

COMPLIES WITH THE FOLLOWING STANDARDS:

- IEC61000-4-2 level 4:
15kV (air discharge)
8kV (contact discharge)
- MIL STD 883E-Method 3015-7: class3
25kV HBM (Human Body Model)

Note 1: For surges greater than the specified maximum value, the I/O will first present a short-circuit and after an open circuit caused by the wire melting.
