TOSHIBA INFRARED LED GaAs INFRARED EMITTER

TLN104, TLN104(LB)

INFRARED LEDS FOR PHOTOSENSORS

TAPE AND CARD READERS
HANDHELD TERMINALS
AUDIO AND VIDEO EQUIPMENT
OPTO-ELECTRONIC SWITCHES

Micro-package (epoxy-resin package)

Double-ended type : TLN104 DIP type : TLN104 (LB)

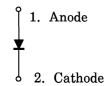

- Can be mounted with 2.5 mm pitch.
- High radiant power: Po = 3 mW (typ.)
- Excellent radiant-intensity linearity. Modulation by pulse operation and high frequency is possible.
- Half-angle value : $\theta_{\frac{1}{2}} = \pm 20^{\circ}$ (typ.)

MAXIMUM RATINGS (Ta = 25°C)

CHARACTERISTIC	SYMBOL	RATING	UNIT	
Forward Current	${ m I_F}$	40	mA	
Forward Current Derating (Ta > 25°C)	ΔI _F /°C	-0.53	mA/°C	
Pulse Forward Current	I _{FP} (Note 1)	400	mA	
Reverse Voltage	v_{R}	5	V	
Operating Temperature	${ m T_{opr}}$	-25~85	°C	
Storage Temperature	$\mathrm{T_{stg}}$	-30~100	°C	
Soldering Temperature (3 s)	T_{sol}	260	°C	

(Note 1): Pulse width $\leq 100 \ \mu s$, repetitive frequency = 100 Hz

PIN CONNECTION

Unit: mm TLN104 0.5 ± 0.1 (0.55) R(1.65) R (0.8) 0.8 ± 0.1 1.77 ± 0.2 2.27 ± 0.2 3.07 ± 0.2 +0.1 0.125 - 0.05 0.7 ± 0.1 (): Reference value **TOSHIBA** 4-2A2 TLN104 (LB) R(1.65) R (0.8) 0.125 - 0.054.3 ~ 7.4 0.7 ± 0.1 (): Reference value **TOSHIBA** 4-2A01

Weight: 0.02 g (typ.)

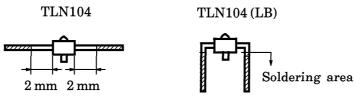

CHARACTERISTIC	SYMBOL	TEST CONDITION		Min	Тур.	Max	UNIT
Forward Voltage	$ m V_{ m F}$	$I_{\mathbf{F}} = 10 \mathrm{mA}$		_	1.13	1.35	V
Reverse Current	$I_{\mathbf{R}}$	$V_{R} = 5 V$		_	_	10	μ A
Rediant Power	PO	$I_{ m F}=20~{ m mA}$	TLN104	1.5	3	_	- mW
			TLN104 (B)	2.5	_	6.0	
			TLN104 (LB)	1.5	3	_	
			TLN104 (B, LB)	2.5	_	6.0	
Capacitance	C_{T}	$V_{R} = 0$, $f = 1 MHz$		_	50	_	pF
Peak Emission Wavelength	$\lambda_{\mathbf{P}}$	$I_{ m F}=20{ m mA}$		_	940	_	nm
Spectral Line Half Width	Δλ	$I_{ m F}=20{ m mA}$		_	50	_	nm
Half Value Angle	$\theta \frac{1}{2}$	$I_{\mathbf{F}} = 20 \mathrm{mA}$		_	±20	_	٥

OPTICAL AND ELECTRICAL CHARACTERISTICS (Ta = 25°C)

PRECAUTIONS

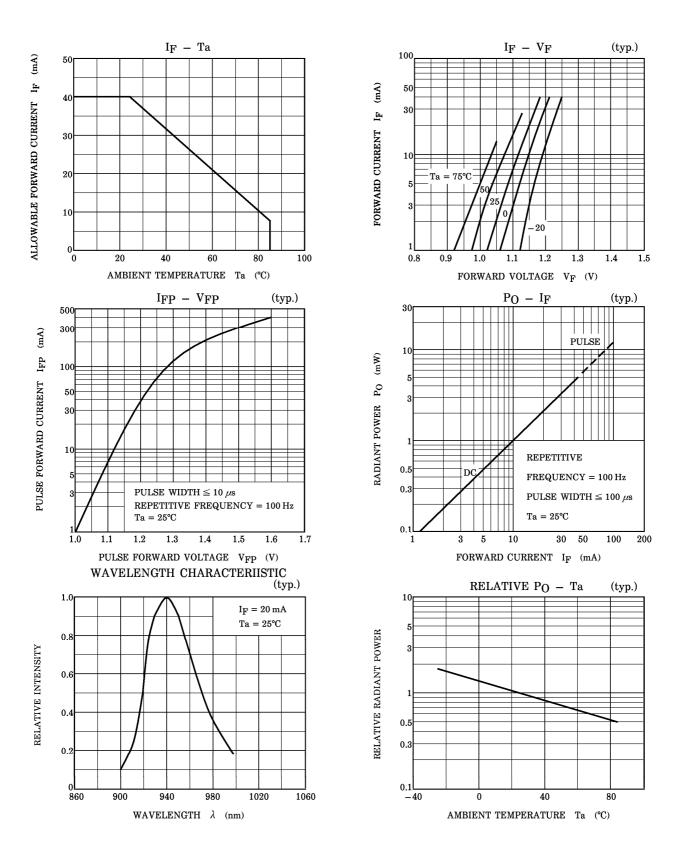

Please be careful of the followings.

- When forming the leads, bend each lead under the 0.8 mm from the body of the device.
 Soldering must be performed after the leads have been formed. However, in case of TLN104 (LB), no lead forming shall be performed.
- 2. Soldering shall be performed within the range shown below.

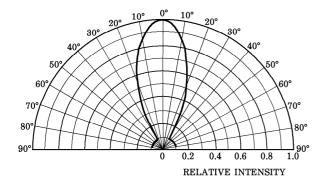

Area 2 mm away from the package ends

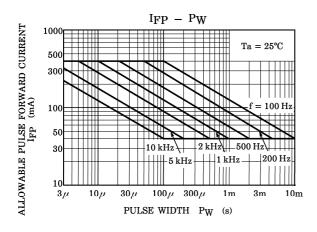

3. Radiant power falls over time due to the current which flows in the infrared LED. When designing a circuit, take into account this change in radiant power over time.

RESTRICTIONS ON PRODUCT USE

000707EAC

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- Gallium arsenide (GaAs) is a substance used in the products described in this document. GaAs dust and fumes are toxic. Do not break, cut or pulverize the product, or use chemicals to dissolve them. When disposing of the products, follow the appropriate regulations. Do not dispose of the products with other industrial waste or with domestic garbage.
- ◆ The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
- The information contained herein is subject to change without notice.
