DESCRIPTION

Hybrid high dynamic range optical receiver module operate over frequency range of 40 to 870MHz with +24V(DC) supply voltage. The module contains a monomode optical input suitable for wavelengths from 1290 to 1600 nm, a terminal to monitor the pin diode current and an electrical output with an impedance of 75 Ω . The optical fibre is terminated by an FC/APC connector(JDS version) and partly reinforced by a 3 mm diameter Kevlar buffer.
