1. When ordering, please specify **packaging** code:

FA2707-BL D

Packaging: D = 13" machine ready reel. EIA-481 embossed plastic tape (200 per full reel).

B = Less than full reel. In tape, but not machine ready. To have a leader and trailer added (\$25 charge), use code letter D instead.

2. Inductance is for the primary, measured at 250 kHz, 0.2 Vrms.

3. Peak primary current drawn at minimum input voltage.

4. DCR for the primary and the secondary is with windings connected in parallel.

5. Leakage inductance is for the primary, measured with the secondary and drive windings shorted.

6. Turns ratio is with the primary and the secondary windings connected in parallel.

7. Output of the secondary is with the windings connected in parallel. Aux winding output is 10 V; drive winding output is 5.5 V.

8. Electrical specifications at 25°C.

Refer to Doc 362 "Soldering Surface Mount Components" before soldering.

The primary and secondary windings are to be connected in parallel on the PC board.
