

Stereo 2.2W Audio Power Amplifier

Features

- **Depop Circuitry Integrated**
- **Thermal Shutdown Circuitry Integrated**
- **Bridge-Tied Load (BTL) or Single-Ended (SE) Modes Operation**
- **Output Power at 1% THD+N, $V_{DD}=5V$**
 - **2.2W/Ch (Typ.) into a 3W Load**
 - **1.8W/Ch (Typ.) into a 4W Load**
 - **1.2 W/Ch (Typ.) into a 8W Load**
- **Shutdown Control Mode, $I_{SD}=0.5 \mu A$**
- **Output Power (SE) at 0.5% THD+N, $V_{DD}=5V$**
 - **90mW/Ch (Typ.) into a 32W Load**
- **Various Power Packages Available**
SOP-16, TSSOP-20, and TSSOP-20P
- **Lead Free and Green Devices Available**
(RoHS Compliant)

General Description

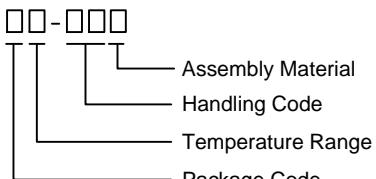

The APA4863 is a stereo bridge-tied audio power amplifier in various power packages, including SOP, TSSOP, and TSSOP-P. When connecting to a 5V voltage supply, the APA4863 is capable of delivering 2.2W/1.8W/1.2W of continuous RMS power per channel into $3\Omega/4\Omega/8\Omega$ bridge-tied loads with less than 1% THD+N respectively. When APA4863 operates in the single-ended load, it is capable of delivering 90mW of continuous RMS power per channel into 32Ω load. The APA4863 simplifies design and frees up board space for other features.

The APA4863 also served well in low-voltage applications, which provides 750mW (1% THD+N) per channel into 4Ω loads with a 3.3V supply voltage. Both of the depop circuitry and the thermal shutdown protection circuitry are integrated in the APA4863, which reduces pops and clicks noise during power up and when using the shutdown mode and protects the chip from being destroyed by over-temperature failure. To simplify the audio system design in notebook computer applications, the APA4863 combines a stereo bridge-tied loads mode for speaker drive and a stereo single-end mode for headphone drive into a single chip, where both modes are easily switched by the HP-IN input control pin signal. For power sensitive applications, the APA4863 also features a shutdown function which keeps the supply current only $0.5 \mu A$ (typ.).

Applications

- **Stereo Audio Power Amplifier for Notebook Computer**
- **Portable Televisions**
- **Portable and Desktop Computers**

Note: ANPEC lead-free products contain molding compounds/die attach materials and 100% matte tin plate termination finish; which are fully compliant with RoHS. ANPEC lead-free products meet or exceed the lead-free requirements of IPC/JEDEC J-STD-020D for MSL classification at lead-free peak reflow temperature. ANPEC defines "Green" to mean lead-free (RoHS compliant) and halogen free (Br or Cl does not exceed 900ppm by weight in homogeneous material and total of Br and Cl does not exceed 1500ppm by weight).

ANPEC reserves the right to make changes to improve reliability or manufacturability without notice, and advise customers to obtain the latest version of relevant information to verify before placing orders.
